FaxMan® SDK by Data Techniques® Supported by Mainpine® RockForce™ Fax Boards

Microsoft Windows® FaxMan Developers Can Integrate the Reliability and Performance of Intelligent Fax Cards with Custom Fax Applications at an Exceptional Price-to-Performance Guarantee

WILSONVILLE, Oregon — June 27, 2006 — Mainpine® Inc., an innovator in the global intelligent fax hardware arena, and Data Techniques, Inc., a leading developer of imaging and facsimile development tools, today announced the award-winning FaxMan fax engine toolkit now supports Mainpine's RockForce™ line of intelligent analog fax boards. The software / hardware combination gives FaxMan developers an advanced, reliable fax card option that includes 2, 4 and 8 channel hardware configurations.

"The compatibility between our FaxMan toolkit and Mainpine's RockForce boards provides a powerful option for software developers and system integrators to easily create mission-critical fax applications," said John Davis, President. "Ease of use is vital to Windows developers. RockForce's universal PCI plug-and-play compliance ensures the board is simple to install with no switches or jumpers to set. Moreover, its size allows it to fit into any PCI or PCI-X slot."

"We're excited to be partnered with Data Techniques and offer an enterprise-class, affordable hardware option for FaxMan, the widely popular fax toolkit for developers and system integrators worldwide," said Lloyd Johnson, President and CEO of Mainpine, Inc. "Several of our partners have built their own fax server applications using the FaxMan SDK. We're pleased to be able to work directly with Data Techniques in offering their developers an intelligent analog fax board option."

About FaxMan® Version 4.0

The FaxMan line of programmable development tools builds upon modular architecture and provides developers with comprehensive fax support. Key feature highlights of the latest release include a new SQL-based database engine to support higher-volume faxing, support for running under Windows Terminal Services and a new .NET component interface to simplify .NET development. FaxMan products are available online directly from Data Techniques, Inc. at www.data-tech.com and from leading vendors of development tools, both in the US and abroad.

About Data Techniques, Inc.

Data Techniques, Inc. is a leading developer of imaging and facsimile development tools and comprehensive support programs for the Microsoft Windows™ environment. The company ships ImageMan® and the FaxMan® series of fax toolkits. Data Techniques began operations in 1984 and is located in Burnsville, North Carolina.
