

# Press Release

## **Data Techniques, Inc. Announces the Release of its ImageMan PDF Export Addon**

*Developers can add royalty free support for writing industry standard PDF files using the ImageMan Toolkit*

**Burnsville, NC, November 2, 2005:** Data Techniques, Inc. a leader in Imaging toolkits has released a new PDF Export Addon for its award winning ImageMan ActiveX and DLL Suites which allows developers to incorporate support for writing PDF files from their ImageMan enabled applications.

The ImageMan PDF Export Addon supports writing both monochrome and color PDF files. Support is included for writing single or multi page files, 48 and 128 bit encryption as well as compressing files using any of the following supported compression methods:

- JPEG
- LZW
- PNG/Flate
- RLE
- CCITT Group3 / Group4

"With the release of the PDF Export Addon we are giving developers the ability to write PDF files from any ImageMan supported raster file in a royalty free solution," said John Davis, Vice President at Data Techniques. "Using the PDF Export Addon our customers can write applications that can directly write industry standard PDF files without the need of external applications or printer drivers."

The ImageMan PDF Export Addon is available online directly from the Data Techniques, Inc. website ([www.data-tech.com](http://www.data-tech.com)) and from leading vendors of development tools, both in the US and abroad. All the libraries are backed by a full 60 day money back satisfaction guarantee when purchased directly from Data Techniques, Inc. A fully featured trial download is available at [www.data-tech.com](http://www.data-tech.com).

Data Techniques, Inc. is a leading developer of imaging and facsimile development tools and comprehensive support programs for the Microsoft Windows™ environment. In addition to ImageMan®, the company ships the FaxMan® series of Fax Toolkits. Data Techniques began operations in 1984 and is located in Burnsville, North Carolina..
