Press Release

Data Techniques, Inc. Announces the Release of FaxMan[®] Version 4.0

Developers Can Incorporate Advanced Fax Capabilities into Their Applications While Saving Months and Headaches With Compelling Competitive Upgrade Pricing at www.data-tech.com

Burnsville, NC, September 6, 2005: Data Techniques, Inc. has released a new generation of its award winning FaxMan fax engine toolkit. The new version builds upon FaxMan's modular architecture and provides developers with even more comprehensive fax support. Designed to offer developers the fastest and easiest way to create *fax enabled* applications, FaxMan includes support for industry standard class 1, 2, 2.0 and 2.1 faxmodems and includes 32 bit components supporting Windows 95, Windows 98, Windows 2000, Windows XP and Windows 2003.

New Features in Version 4.0 include:

- New SQL based High Performance database engine provides enhanced performance for high volume faxing applications.
- Support for running under Windows Terminal Services.
- Support for running the FaxMan engine as a Windows service.
- Support for 33.6K faxing via Class 2.1 modem support.
- New .Net component interface simplifies development of managed .Net applications.
- New user mode printer drivers and print driver architecture simplify application development.
- The ability to retain cover pages for transmitted faxes
- Internal enhancements for improved communications and fax support.

For Release 12 p.m. EST, September 6, 2005

more

"While adding many new features to this release we have still been able to maintain the small size and ease of use so important to developers. With these new enhancements, FaxMan is now the premier toolkit for adding industry standard fax support to Windows applications," said John Davis, President.

The FaxMan products are available online directly from the Data Techniques, Inc. website (www.data-tech.com) and from leading vendors of development tools, both in the US and abroad. All the libraries are backed by a full 60 day money back satisfaction guarantee when purchased directly from Data Techniques, Inc.

Data Techniques, Inc. is a leading developer of imaging and facsimile development tools and comprehensive support programs for the Microsoft Windows™ environment. In addition to FaxMan, the company ships the ImageMan series of Microsoft Windows Imaging Toolkits. Data Techniques began operations in 1984 and is located in Burnsville, North Carolina..
