

**FOR IMMEDIATE RELEASE**

**Data Techniques, Inc. Release ImageMan.Net Twain V3**  
*Twain support for robust .NET applications*

Burnsville, NC, January 26 2011, Data Techniques, Inc., a leading developer of imaging and facsimile development tools, today released Version 3.0 of their ImageMan.Net Twain components. New features and updates include support for the latest Twain Version 2.0 and 2.1 specifications and support for 64 bit applications and scanners.

The ImageMan.Net Twain toolkit is a set of 100% Managed .Net WinForms controls and classes for building applications capable of scanning and acquiring images from Twain compatible scanners and cameras. These lightweight managed controls allow applications to fully control Twain compliant scanners and cameras and returns image data as a .Net Bitmap object allowing it to be easily integrated into your applications.

**New Features in ImageMan.Net Twain**

- . Support for Twain Version 2.0 and 2.1
- . Support for 64 bit applications and scanners
- . New Visual Studio 2010 Online Help for ImageMan.Net Twain
- . New Samples in Visual Studio 2005, 2008 and 2010 formats

John Davis, CEO of Data Techniques Inc, said " Version 3 of ImageMan.Net brings support for the latest TWAIN specification along with support for 64 bit applications. These features make it even easier for developers to create leading edge document management applications with support for the latest development environments, operating systems and scanners. We've been talking with our customers throughout the development of this new version to ensure that we deliver what they need to develop fast, stable imaging apps"

**Availability and Pricing**  
Prices from \$325

Evaluation toolkits are available free of charge from:
